

PURL Campaign “External” Domain Quick Reference Guide

Boingnet PURL campaigns have support for two types of domains.

1. “**Vanity**” domains that are obtained directly through Boingnet’s interface. These domains require no manual intervention to be used with Boingnet PURLs. Please see the Vanity Domain Quick Reference Guide to learn how to search for, purchase and control Vanity domains in the Boingnet interface.
2. “**External**” domains are domains purchased and hosted outside of Boingnet’s control. Often purchased by IT organizations from domain registrars such as GoDaddy, Network Solutions, Register.com (or many others), these domains require manual configuration by a technician in order to funnel traffic to Boingnet PURLs. This guide is designed to assist in the configuration of these “External” domains.

This Quick Reference Guide shows how to configure external domains in the GoDaddy, Network Solutions and Register.com interfaces. Please contact Boingnet at support@boingnet.com to get help with this process.

To Configure an External Domain for a Boingnet PURL Campaign:

In order to point a domain to Boingnet for a **PURL Campaign**, you’ll need to add an ‘**A**’ Record with a Host value of “*” to your domain registrar’s DNS Zone File. This will point everything **except** subdomains that are already assigned to our IP address:

Log in to your hosting company’s admin dashboard, navigate to your domain’s DNS settings, and add an ‘**A**’ Record with the following values.

- **Host:** *
- **Points to:** 64.34.211.176
- **TTL:** 1 Hour
-

Below you will be able to view what your ‘**A**’ Record should look like when entered into Godaddy and Network Solutions. Note that the new and correct IP address for Boingnet is “64.34.211.176”.

GoDaddy

- After logging into GoDaddy, Click your User ID in the upper right corner.
- Next, click **Manage My Domains**:

Control Panel Links: **Manage My Domains** (highlighted), Manage Website Builder, Manage Your Hosting, Manage SSL Certificates

Update Advanced DNS for
boignetdomains.com

Choose this option if you want to use this domain with some Network Solutions services and some non-Network Solutions services. For example, you might continue to use Network Solutions email, but host your website elsewhere. Or, you can keep your Network Solutions website, but use a different provider for email.

Only advanced users should make updates to their Advanced DNS Manager.

Please note: Changes made to these Internet settings may cause you to lose access to your existing email and websites.

IP Address (A Records)

Host	TTL	Numeric IP
www	7200	208.91.197.27 Under construction Page
@ (None)	7200	208.91.197.27 Under construction Page
* (All Others)	7200	208.91.197.27 Under construction Page

Frequently Asked Questions

What is Advanced DNS?
Advanced DNS allows you to manage your DNS records (A, MX, CNAME, TXT and SRV Records) for individual services, such as changing IP addresses, or modifying an email delivery address.

Choose this option if you want to use this domain with some Network Solutions services and some non-Network Solutions services. For example, you might continue to use Network Solutions email, but host your website elsewhere. Or, you can keep your Network Solutions website, but use a different provider for email.

Only advanced users should make updates to their Advanced DNS Manager.

What is an IP Address?
An Internet Protocol (IP) address is a unique number which identifies a computer and its location on the Internet. Your IP address is used to transmit data from a website to your computer.

What is a Mail Server (MX Record)?
MX ("Mail eXchange") records are used to determine the delivery route for your e-mail. For example, if you want to host your own mail server for the domain in your account, you must specify the mail server names as MX records. In addition, you can specify multiple mail servers and rank them by priority to respond in the event the primary mail server

On the next page, find the * Host record and update the **Numeric IP** address with the following

64.34.211.176
